Re: List of Exchanges **B** - Exchanges for Possible Reassignment to POI

SUMMARY: Local exchange carriers (LECs) must respond no later than **October 5, 2005, stating whether the carrier is serving physically located customers in any of the exchanges listed on the attached sheet.**

Attached is a list of exchanges being considered for reassignment to a competitive local exchange carrier (CLEC) point of interconnection (POI) pursuant to the Reassignment to the POI Agreement approved in docket DT 00-223 by Commission Order No. 24,419.

The exchanges listed all have the following characteristics:

- 1) blocks within the NXX code are assigned to a multiple carriers
- 3) none of the carriers to which the blocks are assigned have physically located customers in the exchange.

Therefore, the exchanges on this list (which will be referred to as List B) are being considered for reassignment to a CLEC POI. This reassignment could affect physically located customers who are being served with numbers PORTED from these exchanges.

Accordingly, CLECs and Verizon are asked to review this list to determine if they are serving any physically located customers in any of the following exchanges. LECs must respond in writing no later than October 5, 2005. LECs may respond via email to me at kath.mullholand@puc.nh.gov, by fax to 603-271-3878, or by regular mail.
